

# My hometown - Agria

At a distance of 5 km southeast of Volos lies Agria, a seaside town and tourist resort on the shore of the Pagasetikos Gulf. The town combines sea and mount as it is half an hour away from the ski resort of Chania on mount Pelion.

# My school- Gymnasio Agrias

Gymnasio Agrias is a public lower secondary school. According to the Greek educational system the 3 grades of Gymnasiums are part of the obligatory education.

Our school was founded in 1985. Around 150 students aged 12 to 15 attend Gymnasio Agrias every year. Twenty teachers work in our school, teaching subjects such as Greek Language, Science, Maths , foreign Languages (English, German or French), ICT, Art, Music, R.E. and P.E.

# School Facilities

Gymnasio Agrias is housed in a two - storey building.

On the ground floor there's the teachers' office, the school canteen, the headmaster's office, the classroom where we hold our Erasmus meetings, a classroom where music ed takes place and the library.

On the upper floor there are 8 classrooms which are all equipped with projectors and some of them are decorated with graffiti or paintings created by the students in collaboration with our Art teacher.

# The classrooms

# The school library

Our library was founded in 2000 and it's operated by the students themselves. Students, teachers and parents can choose from a variety of books and borrow them.

# School labs

Gymnasio Agrias has 3 labs:

- the science lab,
- the technology lab
- and the ICT lab.

# Sport Facilities - Gym

Our school yard has two levels. The first level has a handball court- usually occupied by the boys and turned into a football pitch. On the same level there's a volleyball court, the girls' favorite. On the lower level there's a basketball and tennis court.

Gymnasio Agrias has also a poorly equipped gym that is used only when the weather is bad.

# After School activities

The Erasmus projects is not the only after school activity.

This year, with the contribution of the parents council, photography and chess lessons are also offered for the students and the local community.

For the last five years there's a robotics club in our school run by the ICT teacher. The students work on the robot kits under the guidance of the teacher and take part in competitions every year.
